

AnyDoc® **CLAIM**

Automated Claims Processing

Dramatically lower costs and improve productivity.

Claims Processing

The Benefits

- » Minimize Manual Data Entry
- » Boost Productivity
- » Reduce Processing Costs
- » Increase Data Accuracy
- » Improve Turnaround Time
- » Store Full Color Images
- » Standardize with EDI Output

Capture healthcare claim data automatically, precisely and accurately.

Dramatically lower costs and improve productivity.

Sick of the massive amount of healthcare claim forms hitting your company each and every day? Tired of wasting countless hours manually entering all the vital data off these forms? In no other industry is the collection of data more critical. But at the same time, data collection of healthcare claims is inherently difficult and expensive.

Automate all your healthcare claims processing utilizing AnyDoc[®]CLAIM from AnyDoc Software. AnyDocCLAIM is a complete start-to-finish claims processing solution that allows you to automatically feed accurate claim data into your adjudication system and turn your claims around within hours instead of days.

 [Comments: IT Manager of Health Insurance Company](#)

"Our claims processing used to take weeks, now we go from the mailroom to data capture to electronic storage in 48 hours..."

Reduce and even eliminate your need for manual data entry while doubling, tripling or even quadrupling your productivity levels while maintaining up to 100% data accuracy.

With AnyDocCLAIM you immediately reduce the costs associated with processing your incoming HCFA/CMS-1500s, UB04s and dental claim forms by more than 60% per claim. Multiply that by the millions of forms you receive annually and you quickly begin to see benefits that go well beyond its inherent speed and accuracy.

AnyDocCLAIM can even identify document sets and multi-page images. When a document contains both forms and attachments, common with HCFA/CMS-1500s, AnyDocCLAIM saves all attachments with the corresponding claim through all stages of the process, from scanning to capture to storage.

AnyDocCLAIM has been specifically designed to meet the unique requirements of these specialized healthcare forms. Medical claims involve a variety of data from medical procedures (CPT codes) and cause of illness (diagnosis codes) to patient ID number. These must be cross-validated against data tables that are often updated daily. Let AnyDocCLAIM look up the physician ID number in your existing database and automatically translate it into the doctor's information for your records.

The screenshot shows a software interface for processing medical claims. At the top, there's a header for 'TAMPA MEDICAL' at '401 E JACKSON ST'. Below that is a table with columns for Date, Time, CPT Code, Diagnosis Code, Charge, and Status. The table contains several rows of data, with the first row highlighted in red. Below the table, there's a section for 'TAMPA MEDICAL OFFICE' and 'JOHNSON S. SMITH'. At the bottom, there's a section for 'Patient ID' and 'Physician ID' with a dropdown menu for 'LANET D MASON M D' and 'TAMPA MEDICAL OF 401 E JACKSON ST'.

Date	Time	CPT Code	Diagnosis Code	Charge	Status
02 08 97	21	80019	7354	25.00	1
02 08 97	21	81000	7354	8.00	1
02 08 97	21	81000 76	7354	8.00	1
02 08 97	21	85022 76	7354	10.00	1
02 08 97	21	85022	7354	10.00	1
02 08 97	21	85610	7354	7.00	1

Built-in balancing features cross-check each equation to verify total charge, amount paid and balances due. A balanced equation can bypass verification, significantly reducing correction time.

On average, using AnyDocCLAIM allows you to take your incoming claims from mail room to automatic processing to electronic storage and retrieval in less than 8 hours. Full color images of scanned documents are immediately accessible via a desktop PC with just a few keystrokes.
